## **INTRODUCTION**

The purpose of the Destination Survey is to provide the College Community (administrators, staff, faculty, students and alumni/ae) with current information about employment patterns, graduate school enrollment, regional salary information as well as data on who are hiring our graduates.

The Destination Survey is distributed to all undergraduate students of the most recent graduating class six months after graduation. In an effort to collect as much data as possible, phone calls are made during the spring semester in a last attempt to reach the largest pool of recent alumni/ae as possible. As a result of these efforts, we received 583 responses out of a class of 1145, equaling a 50.9% return rate.

We hope that the information shared in this report will be a useful resource to the College Community, providing feedback on what is happening to our graduates after graduation. Copies have been distributed to key Administrators and Deans. Additionally, the survey is available via the Career Services website and a hardcopy will be held on reserve in the Career Resource Center for faculty, students and alumni/ae use. The survey is a work in progress; if you have feedback on items to be included or excluded, suggestions are welcome.
