

=====

= Step 1 =

=====

=COMPLETED=

Downloaded these directions.

=====

= Step 2 =

=====

Download the appropriate client

=====

-Hopefully, you've already done this. If not, enter the appropriate link into your web browser. If you cannot access the page, restart your computer and try again.

-Windows 98/Me/2000/XP:

<http://wireless2.salemstate.edu/vpnclient/vpnclient-win-is-4.0.4.B-k9-WIN9x-XP.exe>

-Linux: <http://wireless2.salemstate.edu/vpnclient/vpnclient-linux-4.0.4.B-k9.tar.gz>

-Macintosh: <http://wireless2.salemstate.edu/vpnclient/vpnclient-darwin-3.7.3.A-GUI-k9.zip>

=====

= Step 3 =

=====

Installing the VPN Client

=====

-A WinZip self-extractor window will come up. Be sure the box next to overwrite files without prompting is checked.

-In the 'Unzip to folder:' box, type: c:\temp

-Click Unzip - The files will extract to the c:\temp folder

-Click on your Start button, then click Run.

-In the 'Open:' box, type c:\temp\setup.exe

-Installation of the client will begin. Select all of the default options in the following windows (Next or Yes).

=====

= Step 4 =

=====

Restart your computer

=====

-The client installation will eventually ask if you want to reboot your computer now. Select yes, and click

Finish. Even if you already had a VPN client installed, you will need to restart your computer to obtain the correct IP settings.

=====  
= Step 5 =  
=====

Starting the Cisco VPN client  
=====

-After your computer restarts, click on your Start button, select 'All Programs', 'Cisco Systems VPN Client', 'VPN Client'. You will need to start this each time you want to connect to the wireless network at SSC.

=====  
= Step 6 =  
=====

Configuring the Cisco VPN client  
=====

-Click on the 'New' button on the top half of the Client Window.  
-In the Connection Entry field, type: SSC-staffdomain  
-In the Description field, type: SSC wireless configuration  
-In the Host field, type: wirelessvpn.salemstate.edu  
-Under the Authentication tab, type staffdomain into the name field.  
Also type ssc1854 in the password and confirm password fields.  
-After all the above settings have been entered, click the 'Save' button.

=====  
= Step 7 =  
=====

Start the Connection to the VPN  
=====

-Double click on 'SSC-staffdomain' to begin the log on procedure to the VPN.

=====  
= Step 8 =  
=====

Log on to the VPN  
=====

-A window will pop up asking for your username and password. Use your SPIRIT username for the username and your SPIRIT password for the password.

=====  
= Step 9 =  
=====

Finished  
=====

-If you completed all of the above steps successfully, you will now be connected to the secured wireless network.

In order to connect to the wireless network after the first time, you will only need to follow steps 5, 7, and 8.  
You will not need to run the above configurations again.
